

### COVID-19: WHICH SURV CODES TO USE?

SURV codes and eNotification forms are vital for contact tracing and the POAC payment.

Please note patients who have symptoms, but no HIS criteria are the only group who do NOT require a SURV code.

Timely completion of eNotification forms is extremely important for our results management process and contract tracing.

**Please enter the SURV code (if one is required) on the lab form AND in the referral details field of the e-Notification form.**

- Patients with symptoms but no HIS criteria – no SURV code needed

**SURV codes are required for the following groups;**

- Patients with [HIS criteria](#) (symptomatic or asymptomatic) – SURV-HIS
- Asymptomatic people requesting swabbing (and are non-HIS) – SURV GEN
- Anyone connected with a current cluster (symptomatic or asymptomatic) but don't have a voucher (SURV code list attached)
- Asymptomatic Border and Managed Isolation Facility (MIF) staff (SURV code list attached)
- Some patients may present for testing with a voucher. This will have a SURV code on it and will need to be entered on the e-Notification Form and Lab Form.

### COMMUNITY TESTING CENTRES AND TESTING POP-UPS

Please find attached an updated list of designated practices and Community Testing Centres (CTCs). Please review as there have been some changes regarding times/locations. In addition, you will find a list of community testing pop-up sites currently planned on the Auckland Regional Public Health Service (ARPHS) [website](#).

These 'pop-up' testing services will continue to move around the community depending on where they are required.

### FundaPen™

Attached to the FF is a letter for GPs, thanking you for your participation in Allergy New Zealand's FundaPen™ Campaign.

The campaign has now ended and free EpiPens are no longer available.

They are particularly grateful for the support the campaign received from PHOs and GPs.

### NHI #S AND IMMIGRATION STATUS INFORMATION

During COVID-19, a number of practices have asked if people need to confirm their immigration status before an NHI can be assigned, for COVID-19 swabbing purposes.

For example, whether a GP can assign a new patient an NHI using the PMS, without confirming their immigration status or if they would need to know the type of visa they were on and then enter this information at the time a new NHI is applied for.

The MoH response –

For Place of Birth and Date of Birth we are able to store Immigration Status as a source of that information however it is not a requirement for assigning an NHI number. A number of NHIs have NZ Citizenship Status which was provided to us by DIA.

NHI numbers are issued to all people who access Health and Disability Services in New Zealand regardless of their Immigration Status for the purpose of treatment and care.

Evidence of eligibility is required to assess a patient's eligibility to enrol with a practice and receive publicly funded healthcare. Registered patients who are not eligible to enrol do not get added in the National Enrolment Service (NES). These will be added in future phases of the project when the eligibility modules contain a comprehensive view of everyone's evidence of eligibility.

### WOMENS HEALTH STUDY

Well Women and Family Trust are offering a Womens Health Study Day - October 29<sup>th</sup> 2020 – please see attached flyer.

This study is particularly suited to Primary Health Care Nurses and GP's with an interest in Womens Health, (including Cervical Screening).
